

## Security

Make your home safer by adding smart lighting from Control4. If your alarm system is triggered flash the lights on your front porch to frighten would-be intruders away. If your smoke detectors go off, light a pathway to the nearest exit. You've already got systems in place to keep your home secure, now you can enhance your security system with the simple addition of a few lighting devices from Control4.

### Suggested System Components:

- Control4® HC-250 or HC-800 Home Controller\*
- Control4® Dimmers or Switches for front porch and hallway lights.

\* At least one HC-250 or HC-800 Home Controller is required
