OvrC Pro and OvrC Home

Key Features:

- With the OvrC Pro Hub installed, not only can we check your internet speed at any individual time but we also can check how your internet is running over time to get a more complete picture of how your internet performs when you need it to.
- If you have any internet enabled products in the house (example: Iphone, Android phone, AppleTV, Roku, etc), the OvrC Pro Hub will identify those products and allow our technicians to check the status of those devices remotely. Some products will even allow our skilled technicians to remotely access those products and fix common issues.
- **Fix Issues With The Touch Of A Button**, when it's late at night, early in the morning, or when it's not convenient to call a professional, use OvrC Home, an optional mobile app personalized by your integrator, to resolve many common issues.
